

Artistic Licence

Artistic Licence offers Micro-Scope manicure!

Artistic Licence is delighted to offer Micro-Scope Manicure, a full service for its popular Micro-Scope 3a DMX tester. Our aim is to take your hard-working Micro-Scope 3a (including units branded by other manufacturers, and whether in working condition or not) and return it to top notch condition. In detail this includes:

- Repair as required
- Replace DMX drivers
- Replacement of damaged or missing switch caps
- Upgrade to latest firmware
- Reflash of e2prom for text and fixture library
- Clean and polish case
- Replace feet
- Latest printed user guide

At our discretion, case parts, motherboard and connectors will be replaced if needed.

This is a return to base service, so the customer pays for transport to and from the Artistic Licence studio. Details of this will be provided by email, once the order is placed.

This service is offered at a fixed net price and no discounts will be applied.
