# Artistic Licence

# moody cvi1

## Quick Start Guide

The full User Guide can be downloaded via the QR code

## Overview

- *moody cvi1*

    - Controls a single intensity channel with CV dimmer output at 12 - 24 VDC (5A total)

    - Wheel controls intensity

## Connections

Outputs are labelled Red, Green and Blue. Connect the negative terminal of your LED lamp to the Red terminal, and the positive to the terminal marked '+ VDC'.

## Operation (moody cvi1)

From factory, the scene channel is programmed to full. At power on, moody i will automatically fade the master level to full over 5 seconds.
If the lights are on, briefly press the control: moody fades the master level to zero over 5 seconds.

If lights are off, briefly press the control: moody fades the master level to the previously used setting over 5 seconds.

Rotate control clockwise to increase master level. Rotate control counter-clockwise to reduce master level. The LED indictor shows the master level.
To set a scene: please see programming instructions below.
# Programming (moody cvi1)

### Step 1

To enter programming mode, press and hold control for 3 seconds.
### Step 2

moody's indicator LED flashes white to acknowledge it has entered intensity programming mode, then shows the intensity of the channel.
### Step 3 - set the intensity

Rotate clockwise to increase intensity.

Rotate counter-clockwise to decrease intensity.

### Step 4 - exit programming mode

Press and hold control for 3 seconds to exit programming mode.

### Step 5 (end)

moody displays the master level and is now in normal operating mode.
